

ANNOTATION

for the graduate work of Parhomenko Yaroslav Grigorovich
on the point: «Features of storage subsystems in highload systems on the example of
social service»

Presented graduate work analyzes the characteristics of data storage subsystems and high load protusu update data in these conditions. Demonstrated the benefits of a systematic approach to the design and implementation of high-Systems as an example of the practical part of this work, which consists of two logical parts - of data storage subsystems and development program update data. The advantage of established programs is much higher relevance of the work and the breadth of coverage by finding not only keywords, but also by their synonyms.

The total volume of 99 pages, of which the bulk - 80 pages, 14 illustrations, 16 tables, 17 bibliographic titles, 4 appendixes.

Keywords: Oracle, SQL, actualization, database, DBMS, highload, software, application.
